

**Map 101      Joann Hilton**

I propose this Map of Council representation because: 1. It optimizes the under-represented low income and Hispanic group in Area 1. It would allow them to vote as a block. 2. It divides up Lincoln Hills and Cata Verdera to lessen the impact of that large, regular high voting block. 3. It is quite evenly proportionate by population.

**Map 102      Bill Murphy**

Proposed Plan

**Map 103      Deana Rhoades**

This was developed using two primary goals 1. Keep the 6 elementary school districts intact within districts as much as possible because this is where neighborhood communities generally form. 2. Divide SCLH and Lincoln Crossing both too large in population to be distinct districts into no more than 2 sections. 4 of the 6 elementary school districts remain intact. LC and Creekside each have a small section split off into the adjacent district. Borders are formed by major roads and the Auburn Ravine. I placed greater emphasis on sensible border locations than on exact population equality but the districts all fall within the population ranges allowed.

**Map 104      George Sittner**

After many iterations this map is the best combination I could format that followed the rules for redistricting as I understand them. Each district touches Hwy65Lincoln Blvd to an extent. Socio-economic areas are kept together as best as possible given the challenges of population distribution.

**Map 105      Eric Kurland**

Looked to capture spirit of communities given significant challenges with population requirements and census blocks. Expect 2020 census with increased population will allow adjustments to shift some areas from District 1 3 into 2. Expect all 5 districts will contain many residents whom support and have a vested interest in a strong vibrant downtown - living working andor shopping eating there.
